

WSS-ACSM Dinner Meeting Announcement

*Thursday,
18 June 2009
6:00 PM*

*Galliano's Cucina Restaurant
16435 Military Rd S,
Seatac, WA 98188*

Join us as
RTC Land Survey Program Instructor
Martin Paquette, PLS, MS
presents:

NAD83/2007

There have been a number of horizontal reference datums in the last 20 years: NAD27, NAD83, HARN, HPGN, NAD83/91, several CORS, ITRF, and the latest NAD83/2007. What is this latest datum and how will it impact our geospatial datasets? What affects will it have on transferring data? Martin's presentation will explain this latest datum – how and why it is used. His presentation will benefit and enlighten those from: GIS, Photogrammetry and Remote Sensing, Civil Engineering, and Survey. Several months ago a question was posed of how to handle data referencing the latest datum on the CPS-GIS list server. Martin will provide us with some of the information we will need to make an informed decision.

This is an informal, informational presentation hosted by the Washington State Section of the American Congress on Surveying and Mapping.

We have limited room, so please let me know if you plan to attend by forwarding an email to ponytrouble@gmail.com as soon as possible.
Dinner meeting price is **\$30.00** and **\$10.00** for students.
